

WORKING REMOTELY?

ASSURANT®

PROTECT YOUR DATA!

DO

DON'T

Make sure your workspace is appropriate for your job responsibilities

Take confidential work-related calls where others can hear you

Secure your electronic devices and physical documents when not in use—keep on your person, locked, or securely stored

Allow your electronic devices, screens or physical documents to be visible and/or accessible to others

W2kmfs?S,i" |

Use a password, PIN, or facial recognition to protect your devices

Let others use your devices for any purpose

Connect to our VPN and use approved devices for all work-related projects and tasks

Use un-approved communication apps for work

Ensure your internet router's wireless security mode is turned on and use a strong password when working from home

Use open, unencrypted WiFi networks

Immediately report cybersecurity issues and misplaced or stolen devices or documents.
